

SOFTWARE DEVELOPMENT PROCESS AUDIT

DO YOU WANT TO SPEND LESS?

By improving your development process you can save a lot of resources
Adding elements of Agile UX and User-Centered Design to your process will result in great UX
Once you have an organised and well defined process you can use it for many projects

WHAT INDICATES THAT YOU NEED SUCH AUDIT?

- Big differences between estimations and actual time and cost of development
- Many tickets related to bugfixes and improvements
- Costs of user support are not marginal
- Users report many bugs and functional errors
- There are problems with communication between developers themselves and also between developers and other people involved in the process
- Requirements are not clearly specified and all functionalities are not fully defined
- When a new person joins the team it is hard to habituate them into the project
- There are no basis documents for the project, eg. with use-cases
- The methodology of development is unclear and not defined
- Everyone in the project knows who is the client or who are the stakeholders
- Every change in the requirements means huge waste of resources
- Each time development process is different, even with very similar projects
- There are no tools used that support software development, such as JIRA, TRELLO or SLACK
- There are no user tests only acceptance tests
- For each project target users and personas are not defined

Contact me and I will prepare a tailored offer that will satisfy your needs.

I will evaluate the current state of the software flow in your company and create a perfectly fitted Agile UX process with all document templates that you will need.

Piotr's experiences in the field of interfaces design, interaction with users and the organization of the software development process were particularly valuable for our young company. Analysis and numerous trainings for our employees carried out by Piotr significantly improved the quality of our portal and increased the comfort of its users. I recommend Piotr as a great specialist with a huge theoretical and practical experience. Great commitment, sympathetic and at the same time professional work atmosphere, complement the competences.
